

Communicable Disease Plan

Aug 11, 2022

INTRODUCTION

Sooke & District Minor Hockey Association (SDMHA) is committed to providing safe and healthy environments for all members of our hockey community. In alignment with [ViaSport](#), [BC Hockey](#), [VIAHA](#) and [SEAPARC](#) facility guidelines this communicable disease (CD) plan outlines the ongoing prevention measures that everyone needs to follow as we transition from prescriptive COVID-19 safety measures to general communicable disease prevention measures that are guided by public health.

SCOPE

This CD plan applies to all SDMHA players, parents, guardians, spectators, team staff, and Executive members engaged in any hockey activity including try-outs, practices, games, meetings, dryland training and other related hockey activities.

TRANSITION PERIOD

In addition to this CD plan, SDMHA may still be required to follow applicable activity-specific (e.g. fundraising, indoor dryland training), safety guidelines or ongoing PHO requirements (e.g. gatherings and events). Similarly, those engaged in travel for practices or games (e.g. out of town games, tournaments) will still need to follow local, provincial or federal travel restrictions, local community entry requirements, as well as facility requirements or safety plans.

COMMUNICABLE DISEASE PREVENTION

Communicable disease prevention focuses on basic risk reduction principles to reduce the risk of transmission of COVID-19 and other communicable diseases. The fundamental components of communicable disease prevention include both ongoing measures to be maintained at all times and additional measures to be implemented as advised by public health during periods of elevated risk. SDHMA will regularly monitor and review communicable disease information from public health authorities, and update the campus community of any changes affecting hockey activities, including updating the CD plan as required.

ONGOING PREVENTION MEASURES

Encouraging players and parents to stay at home when sick

- If you are ill or have symptoms of a communicable disease (e.g. fever and/or chills, recent onset of coughing, diarrhea):
 - please stay home
 - notify your coach or team manager of your absence
- Anyone attending a SDMHA event that is visibly ill or displaying symptoms of a communicable disease will be sent home immediately. The SDMHA Executive will be notified if this should happen and will follow-up to ensure that there is minimal risk to the team(s) and Association.

Promoting hand-washing and hygiene practices

- Washing your hands regularly, or using hand sanitizers if a washroom or sink is not readily available, is one of the most simple and effective ways to minimize the spread of communicable diseases.
- In addition, covering your mouth and nose when you sneeze or cough will also help to reduce the spread of germs.
- All SEAPARC washroom facilities are open and available for players, parents and the public to facilitate regular handwashing. SEAPARC will also continue to supply hand sanitizer stations at all main entrances, and additional locations in buildings with higher occupancy levels, to promote hand hygiene.
- SDMHA teams will keep a supply of portable hand sanitizer available for use.
- Water bottles are for individual use only, it is recommended they be labelled with a name and washed frequently.
- Hockey equipment should be clean and not shared with anyone else.
- For outdoor or dryland activities, individuals should ensure they bring hand sanitizer if washing facilities are not available (e.g. outdoor events, vehicles, field locations, etc.).

COVID-19 SPECIFIC PREVENTION MEASURES

Mandatory face mask/covering

- As of March 11, 2022, wearing masks in public indoor settings is not required by public health. Wearing a mask is a personal choice. Masks are encouraged on public transit and BC Ferries, but not required. Individual businesses and event organizers can choose to continue requiring masks on their premises. It's important that we respect the choices of people, businesses and one another.

Vaccination requirement/proof of vaccination

- There is no need to provide proof of vaccination to access businesses, events or services in B.C. You may need proof of vaccination for international travel.

Spectator capacity

- There is currently no limitation on spectator capacity.

Reducing congregation and crowding in small spaces

- The SEAPARC lobby is small and becomes easily congested. SDMHA strongly recommends players use the dressing rooms when possible, followed by the lobby benches.

RESPONDING TO ELEVATED RISK

- The level of risk of certain communicable diseases, including COVID-19, may elevate from time to time or on a seasonal basis. This may occur at a local or regional level or within a facility.
- In addition to maintaining the ongoing prevention measures, SDMHA will monitor public health information and be responsive to any further directives from the local medical health officer or provincial health officer which could include, for example, implementing enhanced cleaning measures, distancing requirements or masking guidance.

- Any changes to prevention measures during periods of elevated risk will be communicated to those affected in our Association.

COMMUNICATION AND MONITORING

- This CD plan will be available on the SDMHA website and shared widely on SDMHA social media.
- Team staff should ensure that everyone on their teams have reviewed the CD Plan.
- Any new prevention measures will be reinforced through signage, social media and other communication tools when required.
- The ongoing review and evaluation of the CD plan will involve the SDMHA Executive, as part of its annual consultation process on health and safety programs. Monitoring of the ongoing prevention measures is shared responsibility of team staff and Association members.
- Individuals should report any health and safety concerns to their team manager or team safety, who is responsible to follow-up and address any concerns.
